

## Kontrol Sports Eyewear

### “Gel Shock “ range

Top Quality Sold in Europe & USA

UV 400 lens blocks 99.9% of harmful UVA & UVB rays.

1.7mm Polycarbonate lens 50x stronger than glass but 50x lighter, therefore safer for sports.

This is the toughest, most shatter resistant material commonly used for protective goggles lenses. This is the same material used for aircraft windshields! It is scratch resistant (though no lens is scratch proof and dont let advertisers try to tell you otherwise)

Super-Flex Grimalid Resin frame, highly durable & flexible, will flex to incredible degrees without breaking!

The incredible Grimalid flexibility lessens wind resistance in high speed sports such as skiing, cycling or motorcycling. Also 'moulds' to your head shape after time.

Grimalid resin is a very lightweight material, making these sunglasses much lighter than ordinary sunglasses.

Fits firmly but comfortably with ear & nose non slip soft, rubber grips, stays firmly put even during the most frenzied activity!

Ventilation airholes on top of the frame reduces fogging.

Ideal golf frame - regular sunglasses interfere with a golf swing, these sunglasses have no bottom frame so don't interfere with your line of sight.

As Cycling Glasses these fit snugly under a cycle helmet and the narrow arms allow easy side under the helmet straps. With a good wrap around lens , side on sunstrikes are a thing of the past as well. In the unfortunate event of a knock or fall from a bike these glasses become your safety equipment for your eyes unlike all acrylic lens and frames.

Gel Shock comes in 6 versions- Amber , Clear , Yellow , Blue , Mini Blue and SP (which has a frame around the Lens)

### Activity Specific" Lens Colors:

**Sunset Yellow** with blue flash mirror.

Brightens gloomy conditions, worn on overcast days or for poor lighting conditions. Enhances depth perception. Very useful as dusk/dawn or low light driving glasses.

Can be used indoors or outdoors as has a slight blue 'flash mirror' coating, which reduces glare and is fully UV400, filters UVA & UVB rays. This 'flash' mirror gives the lens a variable dual colour look.

SuperFlex Grymalide Frame.....

Also available for The Gel shock range is an additional Prescription lens adapter that fits snugly into the frame and allows the wearer to keep their eyesight clear with the prescription but safe with the Gelshock comfort and durability along with sporting style.
