

Kontrol Sports Eyewear

“Tank “ Model

Top Quality Sold in Europe & USA

UV 400 lens blocks 99.9% of harmful UVA & UVB rays.

1.7mm Polycarbonate lens 50x stronger than glass but 50x lighter, therefore safer for sports.

This is the toughest, most shatter resistant material commonly used for protective goggles lenses. This is the same material used for aircraft windshields! It is scratch resistant (though no lens is scratch proof and dont let advertisers try to tell you otherwise)

Super-Flex Grimalid Resin frame, highly durable & flexible, will flex to incredible degrees without breaking!

The incredible Grimalid flexibility lessens wind resistance in high speed sports such as skiing, cycling or motorcycling. Also 'moulds' to your head shape after time.

Grimalid resin is a very lightweight material, making these sunglasses much lighter than ordinary sunglasses.

Fits firmly but comfortably with ear & nose non slip soft, rubber grips, stays firmly put even during the most frenzied activity!

Ventilation airholes on top of the frame reduces fogging.

As Cycling Glasses these fit snugly under a cycle helmet and the narrow arms allow easy side under the helmet straps. With a good wrap around lens , side on sunstrikes are a thing of the past as well. In the unfortunate event of a knock or fall from a bike these glasses become your safety equipment for your eyes unlike all acrylic lens and frames.

TANK Green

Army Matt Green frame with stylish X design to set it apart from the rest!

Smoke Colour Lens with a light Greenflash mirror coating 'coolest' most relaxing colour on the eyes. Ideal Biker or Driving Frame - If you wanna look mean then these are for you.

Gray or smoke coloured lenses are best suited for driving or general use when true colour perception is important. Best for sunny conditions.

A very light and comfortable frame that 'moulds' to your own head shape after time.
